

Farmer Automatic

# Multi Deck System

Layer Cage

# The intelligent layer cage system

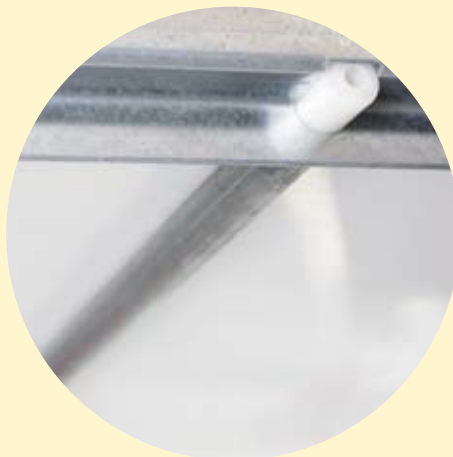

## Farmer Automatic high rise layer system

Continuing to work hard satisfying our customers. Farmer Automatic has numerous configurations and cage sizes to meet your poultry needs. Our Multi Deck Layer Cage System can be customized from 3 to 8 decks with walkways, standard or tall cage sizes to fit your building needs. All Farmer Automatic cage systems meet or exceed UEP guidelines for a stress free environment.

Stainless steel nipple drinkers with V-trough  
Each bird has access to 2 nipples

Safe and hygienic:  
manure removal by means of manure belts on rollers

Fine-quality stainless steel manure belt scrapers

## Farmer Automatic patented EGGSAYER® system

Keeps eggs in a protected holding pattern. Releases eggs gently and safely onto the egg belt, avoiding collisions and hairline cracks. Mylar egg collection belt does not move on cage floor and features a separate tray to prevent eggs from rolling under the belt, or collecting at the cage partition and blocking the flow of eggs.

## Stainless steel nipple drinker

Simple, effective watering system. Each cage contains two nipple drinkers in the partitions plus a catch-cup for each drinker to prevent spillage. Drinkers can be reached from both sides of the partitions and positioned for optimum water supply and visibility. Alternatively 1 nipple pipe in the centre with 2 nipples per cage length and V-trough underneath.

## Automatic manure removal system

Engineered for performance, simplicity and low maintenance. Polypropylene manure belt travel on rollers for safe, trouble free manure transport. Belts deliver manure to end of cage row where cross conveyors remove it from house to reduce ammonia and the flies.

## V-link feeding system

Transports feed with a casehardened link chain and inverted V-bars. Conveys feed in compartments to eliminate feed separation. Feed trough features feed shield and lip to prevent waste.

## Advantages at a glance

- Rugged construction
- Stress-free cage environment
- Plastic coated removable cage floors
- Full width plastic cage doors
- Stainless steel nipple drinkers
- Egg tray, separate from cage floor
- V-Link feeding system
- Solid galvanized partitions
- Manure drying system (optional)
- Complete manure removal system
- Less cracks and checks
- Healthy, full feathered birds
- More eggs per hens housed
- Better feed conversions
- Lower mortality
- Low cost maintenance
- Long equipment life expectancy
- Lower labor cost
